

Guest researchers 2011

Guest researchers give valuable contribution to the research activities at NIOM as and are instrumental in spreading knowledge about dental biomaterials to the health authorities, profession and the public in the Nordic countries.

Anette K. Bølling (NO)

inflammatory response in vitro after monomer and particle exposure

Sigfús Thor Eliasson (IS)

repair of old composite resin restoratives

Charlotta Holm (SE)

mechanical and biological properties of chrom-cobalt alloys

Mandana Hosseini (DK)

dynamic strain of bio ceramic crowns and abutments

Marianne Lilletvedt (NO)

Optimisation of pharmaceutical formulations in antimicrobial light-treatment (photodynamic therapy).

Liselott Lindh (SE)

surface modification of prosthetic materials with active substances, cell- and microbiological surveys

Maj Høygaard Nicolaisen (DK)

comparison of full ceramic bridges with MK-bridges in lateral segments

Kirsten E. Rakkestad (NO)

resin modified restorations and tobacco products, health consequences?

Gro Haarklou Mathisen (NO)

inflammatory response in vitro after monomer and particle exposure

Emma Westas (SE)

antibacterial nanostructured implants for soft tissue application
