

Investigation of efficacy and adverse effects of bleaching chemicals and -procedures

Project start: 2005

Responsible scientists: Ellen Bruzell and Jon E. Dahl

Collaborators: Bjørn Johnsen, Tommy Nakken Aalerud and Terje Christensen, Norwegian Radiation Protection Authority
Ulla Pallesen, University of Copenhagen
Nina Rygh Thoresen, University of Oslo
Catarina Wallman, University of Gothenburg
(now : University of Tromsø)

- A survey on **bleaching treatment efficacy and adverse effects** is undertaken in collaboration with the University of Copenhagen, the University of Gothenburg and the University of Oslo. The study is financed by the Directorate of Health and Social Affairs, Norway. Ongoing project started June 2006. Collection of data was halfway in December 2007. Preliminary data was presented at the Norwegian Society for Toxicology and Pharmacology, Beito, January 2009.
